

NEWS RELEASE

Cameron's Measurement Systems Division acquires Jiskoot Limited

Houston, TX – March 26, 2008 – The Measurement Systems division of Cameron (NYSE:CAM) announced today the acquisition of Jiskoot Limited, a world leader in the design, manufacture and commissioning of sampling, blending and multiphase systems for the global oil and gas industry.

According to divisional Vice President Pat Holley, the deal is clearly a win-win situation for both Cameron and Jiskoot. "Over the past three years Cameron has executed a strategy to strengthen its ability to deliver solutions to the full spectrum of the oil and gas industry including exploration, production, processing, transportation and distribution. By acquiring the Measurement Systems division in 2005 (formerly NuFlo Measurement Systems), it established a high-quality and well-respected foundation in measurement and control. Subsequent acquisitions, such as Caldon, Inc., have allowed the division to expand its technical capability to include fiscal as well as more highly engineered applications. The Jiskoot acquisition is a logical – and highly valuable – progression of this strategy," he explained.

For Jiskoot, the power and capital behind a company of Cameron's size and reputation allows the operation to take advantage of emerging global opportunities for larger projects and engineered sampling systems.

The acquisition also serves to combine Jiskoot's market leadership with the reputation and product portfolios of Cameron's current sampling brands Clif Mock® and True Cut®. "Without question, this merger of technologies and products positions Cameron as the dominant provider of sampling, blending and multi-phase solutions across the entire oil and gas value chain," said Mark Jiskoot. Going forward, Mark Jiskoot will assume the leadership responsibilities for all sampling activities within the Measurement Systems division.

Cameron (NYSE:CAM)

Cameron is a leading provider of flow equipment products, systems and services to worldwide oil, gas and process industries. The Measurement systems division designs, manufactures and distributes measurement and control instrumentation.
